# Lined 45° Ball Check Valve

Type ARL

### Flange Connections

ANSI B 16 5, 150lbs

\*Available on DIN EN 1092-2 P10, P16

### ARL Lined 45° Ball Check Valve

This ball check valve can be installed either vertically or horizontally and offers an unobstructed flow due to the fact that the ball is pushed into the 45° cavity.

For applications where high medium flow turbulences can be expected, installation of an ARL check valve can be the ideal solution to avoid liner damages, as well as for use in horizontal pipes with low flow and low back-pressures.
